

IRMC Survey – April 2006

1. Evaluate the current technology tools (both software and hardware) you specifically utilize in performing your job.

2. What job function would you like to perform better if the technology was available.

3. What programs, primary tasks or functions or learning activities do you foresee performing in 2007- 2010.

4. What is your opinion, in three or four sentences, on the following product:
Halo projection: This technology places a 3d image in thin air in front of the student/viewer.

The projector and software may be used for presentations as well as reproducing data in 3d format for in-depth detail analysis.

5. In the event of an extended system failure (two days or greater shutdown of all technology) to what extent could you continue your functions and how?

6. What technology training needs do you anticipate needing in the next few years?
